**Description**

Add ESD protection on any exposed pins to the board

---

**History**

**#1 - 07/29/2010 07:14 PM - Kevin Woo**

*- Status changed from Assigned to Wontfix*

Lack of room / budget /time. Pins however are more protected anyway since they are either on the FFC which is enclosed, the JST which are below the board, and the robot is enclosed rather than exposed like on the previous models.
