<b>Description</b>			
Find out if it is safe (no degradation of shelf life/performance) to store Urethanes with premixed (liquid) colors. We want to premix large batches of coloring for consistency.

#### History

- Status changed from Assigned to Fixed

Called Tech Support this morning - No degradation of performance or shelf life (as long as using Freeman or Huntsman color tints).

Expected shelf life is 1 year (manufacturers warranty). Note that this is VERY stable compared to products from Smooth-On, Alumilite, etc.
