Description

ala Google's awesome sketchy intro videos

Recruit some design majors?

Rough Storyboard:

Sketch Scout wheels + base
Sketch a full computer+monitor -> open the hood -> computer drops into the engine bay, wheels shake away from base (like on a suspension)

Show robot driving over sketched hills/rocks, in your house over cords, thresholds, looking out over a grand canyon type scene :)

Another option (not the same thing, but also cool as a presentation) is to make a Prezi www.prezi.com.
