

Colony - Enhancement #230

More Friendly Makefile for Library Work

02/04/2008 07:00 PM - Kevin Woo

Status:	Worksforme	Start date:	
Priority:	Normal	Due date:	
Assignee:	Brian Coltin	% Done:	0%
Category:	Library	Estimated time:	0.00 hour
Target version:	Library		
Description			
It's a pain in the ass to modify the library code at the moment and test it. I want:			
<ul style="list-style-type: none">• Makefile that will allow /projects/libdragonfly to be used instead of the /lib directory inside /projects/libdragonfly• Should be able to type 'make all' and will do the above			

History

#1 - 02/08/2008 02:14 PM - Brian Coltin

- Status changed from New to 5

You should separate your test code from your library code. The template is designed for non-test programs. If you want a template for test programs, take the template for normal programs and change the path where it looks for the includes and libdragonfly.a.
