Description

This plugin:

<http://www.redmine.org/wiki/1/PluginTab>

Allows us to include iframe content inline on the wiki --> this way we can dynamically generate the robot status page w/ a php script and display it on the wiki as usual.

History

#1 - 10/02/2009 06:50 PM - Dan Shope

I'd like to do a Ruby on Rails implementation but don't know how..yet. A discussion on the redmine website:

<http://www.redmine.org/boards/3/topics/5109>

#2 - 10/02/2009 07:40 PM - Rich Hong

- Status changed from Assigned to Fixed

- % Done changed from 0 to 100

<https://www.roboticsclub.org/redmine/tab/show/colony>

Right now it has google.com in the iframe. Change it when your robot status page is ready or give me the link to the robot status page.

See, Danshope.com, giving me tickets also work.
